

Good Afternoon,

I am writing to express my support for Bill 5140. Horseshoe crabs are majestic creatures and need our protection. Last summer I went to my local beach and saw three in the shallow water. It was the first time I'd seen them in many years. A few minutes later, a man came and took all three and threw them in his truck. I confronted him, but he said he had a permit. It was awful. I am a Guilford resident and hope this bill can help protect these incredible animals.

Thank you,

Ben Conlon
